Notes for this audience

Private schools may move faster than districts, but should still review license scope, parent communication, privacy, and pricing before scaled use.

The Teacher Edition and Student Edition show exactly what will happen in class. The Implementation Readiness Packet contains parent communication, privacy, accessibility, and IT notes that private-school leaders should review before approving a pilot. The Open Pilot Agreement distinguishes free pilot use from paid or ongoing institutional deployment.

The full preview packet remains available in the full-preview folder. It is an archive/reference copy, not the recommended first read.
